Healthy Eating Can Help BEAT Diabetes

Taking even one of these steps can make a real difference.

🧭 Eat smaller servings — bigger is not better!
✓ Drink water or try diet drinks, seltzer, or 1% milk.
🧭 Have a fruit or vegetable at every meal.
🧭 Eat less fast food — no more than once a week.
Prepare more meals at home.
🕑 Try healthier snacks.
Switch to 1% or non-fat milk, yogurt, cheese, and frozen yogurt.
🕑 Try fish, chicken or turkey instead of red meat.
Switch to healthier oils like olive and canola. Look for oils, spreads, and foods with labels that say "0 grams <i>trans</i> fat."

Physical Activity Can Help BEAT Diabetes

Start with a little activity every day and add a few minutes every week until you reach your goal.

Getting at least 30 minutes of moderate physical activity at least 5 days a week can **HELP you**:

- Prevent or control diabetes (you may reduce your need for medication)
- Lose weight
- Lower your blood pressure and LDL (bad) cholesterol
- Reduce your risk of heart disease and stroke
- Reduce stress

Check with your health care provider before you start a strenuous exercise program.

Health Goals

Ask your doctor about setting goals to help keep your diabetes under control. Check off the goals you want to work on. Make notes on your successes and/or barriers to reaching your goal.
